

Member Engagement Coordinator, Hydrogen BC

Want to work on climate solutions?
To build an expansive professional network?
Unfazed by flaming blimps?

Then Hydrogen BC has a role for you!

About Hydrogen and Hydrogen BC

Clean hydrogen is a core climate solution, alongside clean electricity. The sector isn't as yet developed as wind, solar or batteries, which means you have a better chance of making a bigger difference here, than in those more mature fields. With the fuel cell renaissance having happened in British Columbia many years ago, this position may be the right role in the right place at the right time, for you.

Clean hydrogen is unifying because it can give everyone wins: from renewable energy entrepreneurs to hydrocarbon sector workers; progressives and conservatives; startups and titans; industry and transport.

Hydrogen BC is the regional affiliate of the Canadian Hydrogen and Fuel Cell Association (CHFCA) in British Columbia. We're an industry association who work with members and governments to help scale up clean hydrogen, faster and further. Fuel cells too.

About the Role

In this early-career, Vancouver-based role the Member Engagement Coordinator will:

- Assist Hydrogen BC members with introductions, connections, membership administration and meetings.
- Assist in the recruitment of new members for Hydrogen BC.
- Oversee Hydrogen BC's relationships with government (e.g. the BC Hydrogen Office) and hydrogen hub developers.
- Collaborate with our parent entity (CHFCA) and other Regional Affiliates, and maintain our common national message.
- Create and lead a program to provide hydrogen education and training for emergency responders across the province.
- Coordinate a hydrogen outreach program to post-secondary institutions and high schools.
- Support Hydrogen BC's other activities, including budgeting, planning and general operations.
- Tell the rest of us how to help you advance your career goals.

Requirements

- Post-secondary diploma or degree: business / commerce, engineering, political science, science. Graduates from other programs will also be considered; the technical knowledge can be picked up.
- Strong work ethic; proactive in taking the initiative.
- Interpersonal and communication skills (verbal and written) are key.
- Ability to manage multiple simultaneous projects.
- Microsoft Office proficiency.
- Ability and willingness to travel locally from time to time (member visits, events, etc.)
- Social media talent would be an asset, but is not necessary.

Please submit your application and/or any inquiries to info@chfca.ca with the subject line "Member Engagement Coordinator, Hydrogen BC".
